Subwear Online Retail

Organisation Overview

Subwear Online Store is a proposed retail fashion platform designed to sell streetwear clothing and accessories to a wide range of customers through an online way. The idea of Subwear was deployed in response to the growing demand for any online shopping, especially amongst young individuals who prefer fast digital fashion access products. The business concept is inspired by global e-commerce trends where brands use website or mobile platforms to reach customers.

It was created to solve common challenges faced by many of physical clothing stores such as high rental costs and restricted hours to operate as to how the online store began. The online store allows customers to browse brands and compare to those they need and order anytime which makes shopping flexible. In terms of development, Subwear Online Store is expected to operate as a fully digital business using an e-commerce model. It will include features such as product listing, shopping carts, secure checkout systems and order tracking. Subwear Online Store represents a modern shift in the retail industry where technology and fashion combine to create a convenient shopping experience. It aims to meet the needs of today's digital consumers.

Mission:

- To deliver a user-friendly platform that allows customers to easily browse and purchase fashion products online while ensuring fast delivery and trustworthy.

Vision:

- To become a leading digital streetwear fashion brand that provides affordable and high-quality clothing to local customers and globally.

Website Goals and Objectives

- Increase online sales and brand visibility
- Provide a smooth and fast shopping experience
- Improves customer engagement through promotions
- Enable friendly shopping access

Current Website Analysis

Currently, Subwear has limited or fully not functional e-commerce website. If any basic site exists, limitations are:

- Weak mobile optimization
- Minimal branding and user engagement tools
- Lack of full shopping cart functionality

Proposed Features and Functionality

- Product catalogue (clothing and accessories)-Home Page
- Shopping cart and checkout system-About Us
- Account and order history-Order Page
- Secure online payment-Cart Page
- Order tracking system-logout page

Design and User Experience

- Fast loading pages
- Strong visual branding
- User-friendly filters
- Easy layout navigation

The website is already in use and friendly to navigate within. It illustrates everything in the simplest way to customer to purchase anything online.

Technical Requirements

- HTML5, CSS3, JavaScript
- Pay Fast, PayPal
- MySQL
- Node.js

Timeline and Milestone

- Week 1-2: Planning and research
- Week 3: UI/UX design
- Week 4: Frontend development
- Week 5: Data setup
- Week 6: Testing & Debugging
- Week 7: Maintenance

Budget

Students are eligible to R0 in designing the website.
